

PyTango

- Release 3.0.2 available since 01/2007
 - A new internal class allowing Pogo to generate Python Tango class skeleton with same property management than C++
 - Windows binary distribution
 - Requires
 - Tango 5.5.2
 - Python 2.4
 - Windows X86 - 32 bits

PyTango

■ Next release 3.0.3

- Server/Client → Support of the new 64 bits data type
- Client → Support of the attribute AttributeInfoEx data type
 - Creation of a Python AttributeInfoEx data type
 - Set type of interface than in C++
 - DeviceProxy attribute_list_query() and get_attribute_config() returns an AttributeInfo
 - DeviceProxy attribute_query() returns an AttributeInfoEx
 - Three new methods in DeviceProxy class:
 - attribute_list_query_ex()
 - get_attribute_config_ex()
 - set_attribute_config_ex()

PyTango

- Next release 3.0.3
 - Client → Added a new way to write attribute
 - `dev.write_attribute('MyAttr',data)`
 - Server → Wrapping of the new C++ WAttribute class methods (`set/get_min/max_value()`)
 - Support the new event type on attribute configuration
 - Several bug fixes
