

Igor Khokhriakov

Who am I?

Some facts:

- JavaScript developer since 2007
- Enterprise Java and Web developer since 2008
- Full stack developer since 2012
- C++ developer since 2013
- Tango kernel developer since 2016
- Run private consulting company since 2016

REST API for Tango

- Promote
- Define specification
- mTangoSDK
- TangoWebapp
- Maintenance

The screenshot displays the Tango Webapp interface. The main window shows a device panel for 'TANGO_HOST1' in a 'RUNNING' state. A table lists various attributes with their values and qualities. Below the table, there are two plots: a 'Post attribute [double_spectrum_no]' plot showing a signal waveform, and an 'Image attribute [ushort_image_no]' plot showing a dark blue image.

Name	Value	Quality	Unit	Description
amp0	0	ATTR_VALID		No description
boolean_scalar	true	ATTR_VALID		A boolean scalar attribute
Double Scalar	187.2205634	ATTR_OKAY	cm	double scalar
double_scalar_new	-190.2844955	ATTR_VALID		No description
double_scalar_w	0	ATTR_VALID		No description
float_scalar	0	ATTR_VALID		A float attribute
Scalar Long64	203	ATTR_VALID		No description
long_scalar	65	ATTR_VALID		No description
long_scalar_new	205	ATTR_ALARM		No description

Consulting

- Tango Collaboration
 - Since 2016
- R&D Tango V10 roadmap
- Software development and integration solutions based on Tango
- Popularization of Tango

Thank you!
